## RESEARCH INTERESTS

Category theory and everything about it.

- Stable  $\infty$ -categories
- Homotopical algebra
- Groth(endieck) derivators
- 2-categories and formal category theory
- locally presentable and accessible categories
- type theory and functional programming.

## PRESENT POSITION

- 1 | **Postdoctoral fellow**  
IoC | Tallinn EE

Jan 2020 | —

## PAST POSITIONS

- 1 | **Postdoctoral fellow**  
CMUC | Coimbra PT
- 2 | **Postdoctoral fellow**  
Max Planck Institute for Mathematics | Bonn D
- 3 | **Postdoctoral fellow**  
Masaryk University | Brno CZ
- 4 | **Postdoctoral fellow and Assistant Professor**  
University of Western Ontario | London CA

Jul 2019 | Dec 2019

Sep 2018 | Feb 2019

Mar 2017 | Apr 2018

Sep 2016 | Nov 2016

## EDUCATION

2008 | 2012

- 1 | **Ph.D. in Mathematics**  
SISSA | Trieste  
**thesis:** *t-structures on stable  $\infty$ -categories*
- 2 | **M.Sc. in Mathematics**  
Università degli studi di Padova  
**thesis:** *Orlov reconstruction theorem*
- 3 | **B.Sc. in Mathematics**  
Università degli studi di Padova  
**thesis:** *Monads and Beck's theorem*

Oct 2012 | Jun 2016

Oct 2010 | Jul 2012

Jan 2008 | Jun 2010

## PUBLICATIONS

- 1 | **Factorization systems on (stable) derivators** w/S. Virili |  
1705.08565v3 | to appear on JoA
- 2 | **Categorical notions of fibration** w/E. Riehl |  
1806.06129 | *Expos. Math.* (2019) | doi:10.1016/j.exmath.2019.02.004
- 3 | **Hearts and towers in stable infinity-categories** w/D. Fiorenza, G. Marchetti |  
1501.04658 | *Journal of Homotopy and Related Structures* 2019 | doi:10.1007/s40062-019-00237-0
- 4 | **A standard theorem on adjunctions in two variables**  
1902.06074 | *Preprints of the MPIM*, 2018 (67)
- 5 | **A Fubini rule for  $\infty$ -coends**  
1902.06086 | *Preprints of the MPIM*, 2018 (68)
- 6 | **Homotopical Algebra is not concrete** w/I. Di Liberti |  
1704.00303 | *Journal of Homotopy and Related Structures* (2017): 1-15 | doi:10.1007/s40062-018-0197-3
- 7 | **Sober Ontic Structural Realism and Yoneda lemma**  
abstract at the *Triennial conference of the SILFS*, Bologna
- 8 | **Coend calculus**  
based on 1501.02503v4 | book to appear for Cambridge University Press (2020?)
- 9 | **t-structures are normal torsion theories** w/D. Fiorenza |  
1408.7003 | *Applied Categorical Structures* 24.2 (2016): 181-208 | doi:10.1007/s10485-015-9393-z

## PREPRINTS

- 1 | **On the unicity of formal category theories** w/I. Di Liberti |  
1901.01594v1 | Submitted to TAC, January 2019
- 2 | **Accessibility and presentability in 2-categories** w/I. Di Liberti |  
1804.08710v4 | Submitted to JPAA, January 2019
- 3 | **Localization theory for derivators**  
1802.08193v1 | Submitted to TAC, March 2018
- 4 | **Recollements in stable  $\infty$ -categories** w/D. Fiorenza |  
1507.03913v2

## TALKS

- 1 | **The formal category theory of derivators** Apr 2019  
Invited speaker | Workshop on Derivators - Regensburg
- 2 | **On the unicity of the formal theory of categories** Dec 2018  
Talk on 1901.01594 | ULB - Bruxelles
- 3 | **Accessibility and Presentability in 2-categories** Nov 2018  
Talk on 1804.08710 | Università degli studi di Torino
- 4 | **Homotopical algebra is not concrete** Sep 2017  
Contributed talk | *British Topology Meeting* | Leicester
- 5 | **The formal category theory of derivators** Sep 2017  
Invited speaker | *Some trends in Algebra* | Prague
- 6 | **Sober Ontic Structural Realism** Jun 2017  
Invited speaker | *SILFS* | Bologna

- |                                                                                                        |          |
|--------------------------------------------------------------------------------------------------------|----------|
| 7   <b>Model categories</b><br>Invited speaker   <i>A categorical day in Turin</i>   Torino            | May 2017 |
| 8   <b><i>t</i>-derivators</b><br>Invited speaker   <i>Young researchers in homotopy theory</i> , Bonn | Feb 2017 |
| 9   <b>Coend calculus</b><br>Lectures on <a href="#">1501.02503</a>   Leeds                            | May 2016 |

## TEACHING & ORGANIZATIONAL ACTIVITIES

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| 1   <b>appointee for Adjoint school 2019</b><br>A webinar and online applied Category Theory reading course. The project name is <i>Traversal optics and profunctors</i> . In functional programming, optics are ways to zoom into a specific part of a given data type and mutate it. Optics come in many flavors such as lenses and prisms and there is a well-studied categorical viewpoint, known as profunctor optics. Of all the optic types, only the traversal has resisted a derivation from first principles into a profunctor description. We aim to find such characterization. | Mar 2019                 |
| 2   <b>2-categories</b><br>A short course on 2-dimensional category theory. Tentative program: monoidal and enriched categories, the calculus of coends and Kan extensions, 2-categories, the bicategory of profunctors, the 2-category of derivators, 2-dimensional limits, the formal theory of monads, formal category theory.                                                                                                                                                                                                                                                           | Padova - IT              |
| 3   <b>PSSL 103 - Brno</b><br>I have been one of the organizers of 103rd Peripathetic Seminar on Sheaves and Logic.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | MU Brno - CZ             |
| 4   <b>Formal category theory</b><br>A series of lectures having the scope to breach in Riehl-Verity's theory of $\infty$ -cosmoi.                                                                                                                                                                                                                                                                                                                                                                                                                                                          | MU Brno - CZ             |
| 5   <b>Elements of Finite Mathematics</b><br>Techniques of counting, probability, discrete and continuous random variables.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | UWO London - CA          |
| 6   <b>Homotopical Algebra</b><br>A bottom-up introduction to the language of Homotopical Algebra                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | MU Brno - CZ             |
| 7   <b>appointee for Kan Extension Seminar I</b><br>A webinar and online Category Theory reading course.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Jan 2014   Jul 2014      |
